ASTROPHYSICS AND SPACE SCIENCE

An International Journal of Cosmic Physics

Editor-in-Chief: Zdeněk Kopal, University of Manchester.
Co-Editors: A. G. W. Cameron, Harvard College Observatory; C.-G. Fälthammar, Royal Institute of Technology, Stockholm; C. de Jager, University Observatory, Utrecht; M. Kitamura, Tokyo Observatory; S. B. Pikel'ner, Sternberg Astronomical Institute, Moscow; C. P. Sonett, NASA, Calif.
Assistant Editor: M. D. Moutsoulas, University of Athens.
Editorial Asst.: Mrs E. B. Carling, University of Manchester.

Contents of Volume 24, No. 1 – September 1973

A. Ferrari and E. Trussoni / Magnetic Fields Around Highly Magnetized Objects. – W. R. Webber, J. A. Lezniak, J. Kish, and S. V. Damle / The Relative Abundance of the Isotopes of Li, Be and B and the Age of Cosmic Rays. – Martin A. Lee and Heinrich J. Völk / Damping and Non-Linear Wave-Particle Interactions of Alfvén-Waves in the Solar Wind. – Wen-Wu Shen / Interaction of Interplanetary MHD Shock Waves with the Magnetopause. – Esteban Bajaja and Silvia L. Garzoli / Neutral Hydrogen Observations on H II Regions. – Richard E. Lingenfelter / The Nature of Cosmic Ray Sources. – G. Carpenter and C. S. Dyer / Spectra of Radioactivity Induced in Caesium Iodide Scintillator Crystals by 155 MeV Protons. – Serge Pineault and S. P. S. Anand / On Non-Adiabatic Oscillations of Gaseous Systems in Hydromagnetics. – M. M. Shara and S. P. S. Anand / On Rotating Isothermal Configurations in the Post-Newtonian Approximation of General Relativity. – J. Cohen-Sabban and A. Vuillemin / Ultra-Violet Nightglow Spectrum from 1900 Å to 3400 Å. – S. N. Kathuria and G. L. Kalra / Two-Stream Instability in a Collisionless Plasma. – Zdeněk Kopal / On Secular Stability of Rapidly Rotating Stars of Arbitrary Structure. – G. Tenorio-Tagle / The Gas to Dust Ratio in NGC 6523. – R. F. Sisteró / Hadronic Fireball and Galaxy Formation. – K. Walter / A Photometric Study of the Algol System Y Piscium. – Naonobu Sato / Observational Studies of 12DD Lacertae. I: *Multiperiodicity and Its Variations.* – N. M. Подгорный, Ю. В. Андриянов, N З. М. Дуьинин / Микрофлуктуации Электрического Поля На Фронте Ударной Волны В Модельном Зксперименте. – I. M. Podgorny, Y. V. Andrianov, and E. M. Dubinin / Electric Field Microfluctuations on the Shock Front in the Model Experiment. – J. H. Piddington / Dynamo Theories of the Solar and Galactic Magnetic Fields. – P. Stewart / Relativistically Induced Interstellar Density Fluctuations. – E. N. Parker / Extragalactic Cosmic Rays and the Galactic Magnetic Field. – A. Nishida / Reply to Comments by K. Kawasaki, – L. Mestel / Force-Free Pulsar Magnetospheres. – Abstracts of Forthcoming Papers. – Note Added in Proof.

Subscription price per volume of 500 pages Dfl. 145,–, including postage.
Six volumes are published yearly.
Personal subscription price on request.

DORDRECHT-HOLLAND / BOSTON-U.S.A.

PRACTICAL SCANNING ELECTRON MICROSCOPY
Electron and Ion Microprobe Analysis

edited by **Joseph I. Goldstein,** Lehigh University, and **Harvey Yakowitz,** National Bureau of Standards
Foreword by **T. E. Everhart**

"This is an outstanding book . . . and should become the standard text for scanning electron microscopy (SEM) and electron probe microanalysis (EPMA) . . ."—**L. S. Birks,** *Analytical Chemistry*

582 pages, illus., $35.00

DIGITAL ELECTRONICS AND LABORATORY COMPUTER EXPERIMENTS

by **Charles L. Wilkins,** University of Nebraska, **Sam P. Perone,** Purdue University, **Charles E. Klopfenstein,** University of Oregon, **Robert C. Williams,** 3M Central Research Laboratories, and **Donald E. Jones,** Western Maryland College

". . . provide[s] an important component in a course on digital electronic and laboratory computer interfacing and should be considered by anyone developing such a course."—**Peter C. Jurs,** *Analytical Chemistry*

284 pages, illus., $15.00

PHOTOELECTRON AND AUGER SPECTROSCOPY

by **Thomas A. Carlson,** Oak Ridge National Laboratory

". . . very lively and authoritative . . . well referenced and contains a great deal of useful tabulated data. It should be valuable both to the general reader and the specialist in the field."—**W. C. Price,** *Nature*

417 pages, illus., $32.50

PRINCIPLES OF LASERS

by **Orazio Svelto,** Polytechnic Institute of Milan and National Research Council of Italy
Translated from Italian by **David C. Hanna,** Southampton University

"Anyone mastering the contents of this book will be well prepared to understand advanced treatises and research papers in laser science and technology."
—**Arthur Schawlow,** Stanford University

376 pages, illus., $25.00

LASER APPLICATIONS IN MEDICINE AND BIOLOGY
Volume 3

edited by **Myron L. Wolbarsht,** Duke University Medical Center

review of a previous volume in this dynamic series:

". . . authoritative, up-to-date reference . . . Invaluable for all concerned with present and future uses of lasers in biology and medicine."—*Aerospace Medicine*

approx. 330 pages, illus., $27.50

INTRODUCTION TO BIOELECTRODES

by **Clifford D. Ferris,** University of Wyoming, Laramie

"For the analytical microchemist, this text should be an excellent source book for techniques. . . . The clinical chemist should also add this text to his library. The text is written in a direct fashion and the theory is readily understandable. . . . —**Samuel Natelson,** *Microchemical Journal*

243 pages, illus., $19.50

STRUCTURE DETERMINATION BY X-RAY CRYSTALLOGRAPHY

by **M. F. C. Ladd,** University of Surrey, England, and **R. A. Palmer,** University of London

Offers a detailed tutorial introduction to x-ray structure determination, including not only fundamental methods in structure analysis, but also the heavy atom, isomorphous replacement, and direct methods techniques.

350 pages, $35.00

MODERN FLUORESCENCE SPECTROSCOPY
Volumes 1 and 2

edited by **E. L. Wehry,** University of Tennessee, Knoxville

In this two-volume set, recognized experts describe in careful detail the most powerful and productive recent advances in the methodology and applications of fluorescence—subjects not yet discussed in the standard texts.

Volume 1: *238 pages, illus., 24.50**
Volume 2: *459 pages, illus., $29.50**

THE LABORATORY RECORDER by **Galen W. Ewing** and **Harry A. Ashworth,** Seton Hall University.

129 pages, $18.50

INTRODUCTION TO NUCLEAR RADIATION DETECTORS by **P. J. Ouseph,** University of Louisville.

194 pages, $18.50

ANALYTICAL ATOMIC SPECTROSCOPY edited by **William G. Schrenk,** Kansas State University.

375 pages, illus., $32.50

NONEMISSIVE ELECTROOPTIC DISPLAYS

edited by **A. R. Kmetz** and **F. K. von Willisen,** BBC Brown, Boveri & Company, Ltd., Baden, Switzerland

360 pages, illus., $35.00

DIGITAL PROCESSING OF BIOMEDICAL IMAGES edited by **K. Preston, Jr.,** Carnegie-Mellon University, and **M. Onoe,** University of Tokyo

approx. 440 pages, $35.00

LOW-TEMPERATURE X-RAY DIFFRACTION: Apparatus and Techniques by **Reuben Rudman,** Adelphi University. A volume in the Monographs in Low-Temperature Physics series.

approx. 260 pages, illus., $35.00

MÖSSBAUER EFFECT METHODOLOGY: Volume 10 edited by **Irwin J. Gruverman** and **Carl W. Seidel,** New England Nuclear Corporation

approx. 342 pages, $32.50

ATLAS OF CARBON–13 NMR DATA: Volume 1

by **E. Breitmaier, G. Haas,** and **W. Voelter,** University of Tübingen, Germany.

approx. 200 pages, $59.50

JOURNAL OF STATISTICAL PHYSICS – Volume 15, 1976

The *Journal of Statistical Physics* accepts papers in the fields of statistical mechanics and thermodynamics of equilibrium and nonequilibrium processes. Papers on plasma physics, biology, stochastic processes, fluid dynamics, and chemical physics are also accepted provided they are of general interest in relating macroscopic behavior to microscopic interactions.

The general criteria for contributions are as follows. Papers should present important new results, and review papers should provide new insights. Clarity of presentation is important in all cases but, in many cases, particularly for review papers, it is the decisive criterion for publication. Each paper should be written in such a way that a clear understanding of the problem and of the results can be obtained from the abstract and introduction. Given that a paper meets these criteria, shorter papers are greatly preferred to longer ones. In summary, the journal publishes papers with important new results written clearly and concisely.

The journal also accepts communications in the following departments: news of meetings, questions and answers, book reviews, and letters to the editor.

CO-EDITORS

Joel L. Lebowitz, Physics Department, Belfer Graduate School of Science, Yeshiva University, New York, New York

Howard Reiss, Department of Chemistry, University of California, Los Angeles, California

EDITORIAL BOARD

J. A. Barker, IBM Research Laboratory, San Jose, California
Rodney Baxter, The Australian National University, Canberra, Australia
Bruce Berne, Columbia University, New York, New York
E. Brezin, CEN Saclay, Gif-sur-Yvette, France
D. Chandler, University of Illinois, Urbana, Illinois
E. G. D. Cohen, Rockefeller University, New York, New York
K. F. Freed, University of Chicago, Chicago, Illinois
Giovanni Gallavotti, University of Rome, Rome, Italy
Eric Heller, University of California, Los Angeles, California
P. C. Hemmer, Trondheim University, Trondheim, Norway
L. Kadanoff, Brown University, Providence, Rhode Island
R. Kubo, University of Tokyo, Tokyo, Japan

CONTENTS

Vol. 15, No. 1 July 1976

ARTICLES

Long-Time Behavior of the Angular Velocity Autocorrelation Function for a Fluid of Rough Spheres (NONEQUILIBRIUM STATISTICAL MECHANICS) 1
G. Subramanian, D. G. Levitt, and H. T. Davis

Asymptotic Time Behavior of Correlation Functions. II. Kinetic and Potential Terms (NONEQUILIBRIUM STATISTICAL MECHANICS) 7
M. H. Ernst, E. H. Hauge, and J. M. J. van Leeuwen

Asymptotic Time Behavior of Correlation Functions. III. Local Equilibrium and Mode-Coupling Theory (NONEQUILIBRIUM STATISTICAL MECHANICS) 23
M. H. Ernst, E. H. Hauge, and J. M. J. van Leeuwen

Renormalized Theory of the Time-Dependent Pair Distribution Function. I. General Formulation (STATISTICAL MECHANICS) 59
G. Tenti and F. R. McCourt

H-Theorem for the Hard-Sphere Gas (STATISTICAL MECHANICS) 73
D. Hubert

Future Contributions to *Journal of Statistical Physics* 85

Vol. 15, No. 2 August 1976

ARTICLES

Ensemble Mechanics for the Random-Forced Navier–Stokes Flow (CONTINUUM MECHANICS) 87
Iwao Hosokawa

On the Dynamical Basis of Macroscopic Theory (STATISTICAL MECHANICS) 105
V. P. Vstovsky

On the Zero Fluctuation of the "Microscopic Free Energy" and Its Potential Use (STATISTICAL MECHANICS) 123
Hagai Meirovitch and Z. Alexandrowicz

A Statistical Theory of Excitable Membranes. Nonlinear Force–Flux Relation and Fluctuation (STATISTICAL BIOPHYSICS) 129
Yōji Aizawa and Yonosuke Kobatake

On the Path Integral Representation of Stochastic Processes (STOCHASTICS) 141
Kazuo Kitahara and Horia Metiu

A Theory of $1/f$ Current Noise Based on a Random Walk Model (STOCHASTICS) 149
J. K. E. Tunaley

The Two-State Random Walk (STOCHASTICS) 157
George H. Weiss

Diffusion in a Lattice of Randomly Placed Sites and Application to ac Conductivity (KINETICS) 167
J. K. E. Tunaley

Future Contributions to *Journal of Statistical Physics* 179

Announcements 180

Vol. 15, No. 3 September 1976

ARTICLES

Formal Structure of Kinetic Theory 181
Eugene P. Gross

Scattering Length and Diffusion 215
J. M. Luttinger

An Exactly Soluble Case of the Triangular Ising Model in a Magnetic Field 219
A. M. W. Verhagen

Nonlinearity in Cooperative Systems—Dynamical Bethe–Ising Model 233
Yukio Saito and Ryogo Kubo

Statistical Thermodynamics of an Anharmonic Oscillator 255
Martin Schwarz, Jr.

DEPARTMENT

Erratum: Variational Approximations for Renormalization Group Transformations 263
Leo P. Kadanoff, Anthony Houghton, and Mehmet C. Yalabik

Future Contributions to *Journal of Statistical Physics* 265

Vol. 15, No. 4 **October 1976**

ARTICLES

Linear and Nonlinear Relaxation and Cluster Dynamics Near Critical Points 267
R. Kretschmer, K. Binder, and D. Stauffer

On the Properties of a Periodic Fluid 299
M. J. Mandell

Successive Bifurcations Leading to Stochastic Behavior 307
John McLaughlin

Inequalities for Continuous-Spin Ising Ferromagnets 327
Garrett S. Sylvester

Future Contributions to *Journal of Statistical Physics* 343

Vol. 15, No. 5 **November 1976**

ARTICLES

Monte Carlo Studies of Percolation Phenomena for a Simple Cubic Lattice 345
Amit Sur, Joel L. Lebowitz, J. Marro, M. H. Kalos, and S. Kirkpatrick

Studies in Nonlinear Stochastic Processes. I. Approximate Solutions of Nonlinear Stochastic Differential Equations by the Method of Statistical Linearization 355
Aaron B. Budgor

Studies in Nonlinear Stochastic Processes. II. The Duffing Oscillator Revisited 375
A. B. Budgor, K. Lindenberg, and K. E. Shuler

A Simple Calculation for the Average Number of Steps to Trapping in Lattice Random Walks 393
Kurt E. Shuler, Howard Silver, and Katja Lindenberg

Rigorous Results for General Ising Ferromagnets 399
Charles M. Newman

Quantum Corrections for Lattice Gases 407
Frank H. Stillinger

Model for Density Variation at a Fluid Surface 423
J. K. Percus

Future Contributions to *Journal of Statistical Physics* 437

Announcement 438

Vol. 15, No. 6 **December 1976**

ARTICLES

Solution of Ornstein–Zernike Equation for Wall–Particle Distribution Function 439
L. Blum and G. Stell

A Comment on Chemical Langevin Equations 451
C. W. Gardiner

Statistical Dynamics of the Lorenz Model 455
M. Lücke

An Observation on the Effect of Fluctuations Far from Equilibrium: The Lotka–Volterra Model 477
Joel Keizer

Corner Transfer Matrices of the Eight-Vertex Model. I. Low-Temperature Expansions and Conjectured Properties 485
R. J. Baxter

Equilibrium State of a Classical Fluid of Hard Rods in an External Field 505
J. K. Percus

An Alternative Formulation of Rigorous Mean-Field Theory 513
D. J. Gates

NOTE

On the Connection Between Zwanzig's Classical Projection Operator Formalism and Coarse-Graining 517
Paul Hoyningen-Huene

Future Contributions to *Journal of Statistical Physics* 519

Author Index to Volume 15 521

Subject Index to Volume 15 523
